

SAFETY TIPS n.º54 September 2009

## What to do if your clothes catch fire

Don't run around
You'll make the flames worse.
You'll only fan the flames and make them burn faster

Lie down and roll around
This makes it harder for the fire to spread. It also reduces the effect of flames on your face and head (flames burn upwards).

Smother the flames
with a heavy material, like a coat or blanket.
This blocks the fire's supply of oxygen

Remember, Stop, Drop and Roll!
