ALWAYS STORE HAZARDOUS PRODUCTS IN APPROPRIATE PLACES

Proper storage of hazardous products can prevent you from serious accidents.

Please see some basic rules for hazardous products appropriate storage:

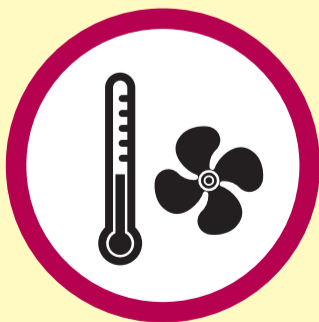

Close lids tightly so products will not dry out, leak or evaporate.

Store products in original containers with the label intact.

Make sure products are not reachable by children or pets.

Store products in a cool, dry and ventilated place away from heat or flame.

Separate flammables, corrosives and poisons. Store them on separate shelves.

If necessary, use adequately sized retention basins.
